DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the circuit board having a contact terminal disposed on both sides must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

2. Claims 1 and 2 are objected to because of the following informalities:

Re claim 1: Substitute "the circuit" with -- the circuit board -- (see line 4)

Re claim 2: Substitute "Memory Card" with -- memory card -- (see line 1).

Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Asakura (5,995,372).

Asakura teaches a memory card 10 having a one sided metal plate package structure comprising a circuit board 2 and a case 3, wherein the size of the case is a little smaller than that of the circuit board; a space being formed between the case 3 and the circuit board 2; a contact terminal 4 is disposed on one end of the circuit board with exposure which is not covered by the case; and wherein both sides of the circuit board being disposed with a contact terminal (see abstract; figures 1A-1C; col. 4, line 41 to col. 5, line 16).

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Wallace (US 6,410,355) discloses a semiconductor package using terminals formed on a conductive layer of a circuit board; and Asakura (US 5,784,259) discloses a memory card having a one sided metal plate type package structure.
